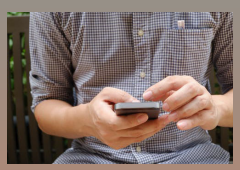
DR CLOUD EHR
ENSOFTEK

With our secure, always on architecture, we take on the infrastructure responsibility so you can do what you do best — taking care of your consumers.



Access DrCloudEHR Anytime, Anywhere

Connect with DrCloudEHR from any Mobile Device

Access to health information that enables informed interactions is critical to your consumers' health and well-being as well as for the success of your practice. Connecting to your electronic health records (EHR) anytime, anywhere helps your professionals make informed decisions which in turn helps drive better clinical and business outcomes. Your connected mobile device is all you need for complete access to DrCloudEHR™, allowing you to provide continuous care from any mobile devices.

No Internet, No Connection, No Problem!

When you are completely disconnected, DrCloudEHR | Unplugged™ lets you work independently of the Internet: in the office or the community, hospitals, school settings, and more. Using a dedicated tablet or laptop with DrCloudEHR | Unplugged you get continuous, secure access to your caseload and consumers' health records to meet your business needs.

DrCloudEHR | Unplugged Supports:

- Secure, encrypted access to your data
- Continuity in service delivery
- HIPAA compliant remote access
- Automatic synchronization
- Simplified on-boarding
- Disaster recovery planning
- Data security with a remote system wipe
- Offline updates and compliant records
- Increased productivity and efficiency

Secured Mobility

DrCloudEHR is committed to mobile security. Safeguarding access to personal health information (PHI) matters more than ever. Protecting your records with Unplugged, while in-house or on the go, is required to protect your investment and ensure better outcomes.

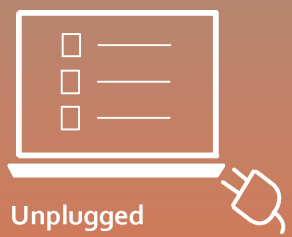
- Telehealth Management
- Executive Reporting

HIPAA Compliant:
- Transmission
- Security
- Privacy



DrCloudEHR | Unplugged Delivers…

Use a tablet or laptop with DrCloudEHR | Unplugged for disconnected access to your caseload, consumers' health, and business records.

Synchronize encrypted data to your device automatically when connectivity is available; ensuring full compliance and accurate record keeping.

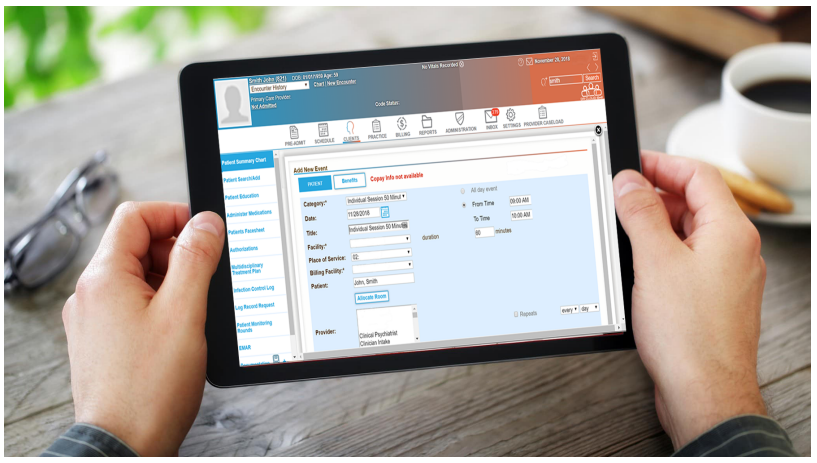
…So You Can Too

Keep a complete, system synchronized laptop on-hand to ensure access to DrCloudEHR during times of Internet outages (e.g. natural disasters). Ensure your complete health records are available in times of crisis, and when your facility is without power or Internet connectivity. The entire database of health records stays available so you can access your clinical data, anytime, anywhere, in times of need.

Use Unplugged in Minutes

Train your DrCloudEHR clinical users to go unplugged in under 10 minutes. Using the identical user interface that they already know maximizes ease of use and minimizes learning.

- Census data
- Treatment/care plans
- Consents and releases
- Scheduling
- Documentation
- Assessments
- Notes/ Group Notes
- Allergies/ Vaccinations
- Billing information
- Medication profiles



Keep Your Data Secure

If the Unplugged laptop or tablet is compromised (e.g. lost), DrCloudEHR with industry-standard, remote-wipe capabilities, keeps your data safe. Our secure, HIPAA compliant, and integrated EHR solution is designed for:

Behavioral Health | Human and Social Services | Integrated Primary Care

DrCloudEHR | Unplugged because your business demands it!
